

# C111 LP

Lightweight Ear Hook Microphone

**AKG**<sup>®</sup>  
by HARMAN

## Small AND Effective

The C111 LP is built of stainless steel – an almost unbreakable material – to ensure ruggedness and reliability. Still it is bendable, which allows perfect fitting to any head size of any performer. The tiny skin boom visually disappears against the face. With only 7g of weight it is very comfortable and convenient to use. A flat frequency response ensures perfect audio quality. A carrying pouch, a windscreen and a cable clip complete a microphone, fitting all AKG pocket transmitters.

*Stainless steel*

*Soft and flexible boom*

*Ultralight weight design*

*Excellent sound*

*Carry pouch and cable clip*

*Fitting all AKG pocket transmitters*
